

A Brief History

Export Manager

Dear Customer

We "V.V. Industries", a reputed proprietorship firm engaged in the manufacture, supply and export of the Finest Quality Desiccated Coconut Powder. Our products are offered under the brand name "OM SAKTHI". These are processed using high quality coconut at our hi-tech processing unit. Owing to their excellent quality, wide ability and longer self life, these have massive demand in the market. Keeping in mind the specific requirements of the customers, we are offering the best quality products to our clients. Our customers can avail these products at Industry leading prices.

We have selected a panel of professionals on the grounds of their qualification, expertise and experience in their particular sphere. All our team members maintain close co-ordination with our customers in order to understand their each specification and instructions. We provide various trainings to help our professionals remain side by side with the newest developments in the industry and to help them further sharpen their process skills. Our quality testing unit tests the products on given parameters and insures that the products conform to global quality standards. We double-check that a successful communication system is developed with the customers so as to deliver flawless range to them. Further, the feedbacks, queries and proposals of our patrons are welcomed with due respect, so as to meet their precise requirements.

Under the able and efficient guidance of Our Proprietor, Sri. Vasudevan, who has years of experience in this domain, we have established a strong foothold in the market. His transparent dealings, ethical policies and found strategies have enabled us to muster a huge clientele across the market.

About Desiccated Coconut Powder

Desiccated Coconut is Coconut Meat which has been shredded or flaked and then dried to remove as much moisture as possible. There are a number of different styles of Desiccated Coconut used around the world and availability of this coconut product varies, depending on the region where one is shopping.

If Desiccated Coconut is not available, regular dried coconut can be used as a replacement, although dried content tends to have higher moisture content, despite the "dried" in the name.

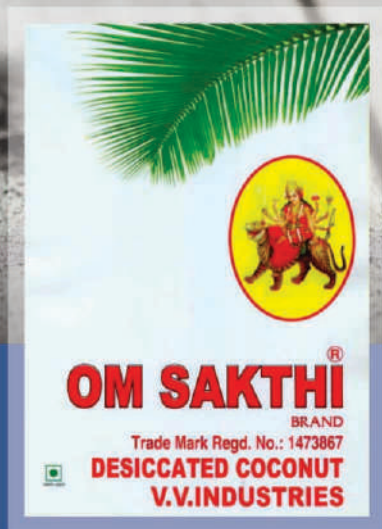

One of the most common forms of Desiccated Coconut is an unsweetened, very powdery product which is produced by drying shredded coconut and then grinding the shreds. It is also possible to find coarser Desiccated Coconut, such as desiccated shreds and even flakes of coconut. Many producers also make sweetened versions. The label should clearly specify where or not the coconut has been sweetened.
